

How to Install the: **Long Haul Hand Tiller**

To the new Hand Tiller Customer,

1. You will need to center your new L.H. Hand Tiller onto your existing rear coaming piece (boomerang).
2. Mark the hole onto the boomerang.
3. Remove the boomerang from the kayak and drill a 1" hole thru, where the hole has been marked.
4. Now you can insert your boomerang back into your kayak.
5. Your L.H. Hand Tiller has a bolt and a wing nut attached onto the boomerang application piece, attach the metal fitting onto the rear boomerang piece.
6. The webbing strap will need to be laced around rib # 6.
7. Cinch the webbing strap tightly.
8. Lastly attach the Hand Tiller cables to your kayak yoke.

Please contact Long Haul Folding Kayaks if you have any questions concerning your new L.H. Hand Tiller.

Thank you,
The Long Haul Folding Kayak Staff
